## Chairman's Message

HADI International, with its rich professional management highly trained and experienced professionals endeavors to serve and satisfy our customers to the optimum and Achieve par excellence through quality service & commitment.

HADI aims to be recognized by our clients as one of the most reliable Construction, Contracting, Steel Structures, Fabrication, Equipment Rental & Industrial Services Organization.

Everyone in the Sun State family works collectively to ensure your order is completed and delivered on time, everytime. We draw immense satisfaction from the projects where we work with clients to produce customers delight, The level of excellence permeates the entire organization.

Looking forward to serve you and assuring you best of your services.

Best Regards,

**For Hadi International Trading & Contracting Company**

Construction – Steel Structure – Industrial Services

## Transmittal Letter

Date:

Kind Attn:

Subject: [HADI International Trading & Contracting Company.](#)

**HADI International Trading & Contracting Company (HADI)** is a 100% Saudi Company, based at Jubail. HADI was established in 2002, during that time the company Hadi Industrial Services & General Contracting Est. was engaged in Fabrication & Installation of ware house structures and activities pertaining to structural Fabrication. Although the focus was mainly on fabrication activities HADI soon successfully expanded into related business of Industrial services and supply of Steel Flanges and valves, cam lock fittings and carbon steel fittings etc. With a view to expand its horizon further in the field of Engineering and construction of process plant projects in chemical, fertilizer, oil & gas, petrochemical, power projects, infrastructure projects with a mission to achieve recognition and growth through customer satisfaction, employee motivation and innovative approach, HADI International Trading & Contracting Company, an ISO 9001 company, came into existence.

**HADI International Trading & Contracting Company** has a wide spectrum of activities like **Civil Construction; Contractor for Electro Mechanical and Instrumentation; Structural Fabrication & Industrial Services**, working as a partner in execution of projects and working as a reliable local partner to provide Construction, Contracting, Equipment rental, Steel Structural Fabrication, Industrial services to execute projects for all overseas principals and local partners.

**HADI** undertakes small, medium size civil & electro mechanical construction projects on turnkey basis:

In **Civil Construction Division** we undertake Backfilling, Excavation, Asphalt, Concrete, Paving, Foundations, Road works, Sewerage & Water Treatment Plants works, Heavy Foundations and Building Constructions etc.,

**Contracting Division** is a strong “arm” of company specialized as an electro mechanical contractor for Petro-chemical plants, Pipe mills, Air Separation plants, Cement Plants, Gypsum Plants, Non-woven products, Supply erection & commissioning of plant equipment, Plant Services involving overhaul & maintenance during turnarounds / shutdowns, Pre-fabrication and installation pipe modifications, Insulation and cladding services, Bolt tightening and tensioning services, Installation of Fire Fighting Equipment etc.

**HADI** comprises of a strong team management of technical expertise, experienced professionals in executing Projects, Contracts, Electrical & Instrumentation, Construction, Project Planning, Costing, HSE and dedicated back up service by qualified technicians & skilled staff, equipment resource and Logistics support to provide quality service support, commitment.

## Transmittal Letter

**HADI Structural & Steel Fabrication** undertakes execution fabrication & installation of Heavy ware houses, Metering stations, Heavy duty sliding gates, pipe racks, equipment structure & plant structure, Pipe line installations for water & Oil, Anchor sleepers, mezzanine floor etc., We have experience of carrying out general fabrication for clients. Our structural erection crew are capable for completing any project, medium and small sized. Highly experienced in complex erection methodologies & techniques which are backed up by in-house fleet of equipment and experienced riggers.

**HADI Equipment rental** undertakes rental for Cranes, Man-lifts, Tele-handlers, Welding Generators, Tower lights, Air Compressors, Power Generators, Loaders, Excavators, Vacuum Trucks, Welding Rotators, Welding Positioners, Welding Column & Boom, Vibratory Hammers, Dewatering Pumps etc.,

**HADI** has the technical expertise, trained, experienced and Certified Operators & Riggers, dedicated back up service by qualified technicians, equipment resource and Logistics support to provide quality service support, commitment and *Lifting solutions to suit your requirements* tailor made by our diligent and highly professional team for medium sized construction projects.

**HADI** is under the process for being registered as an approved vendor with Saudi Arabian Oil Company (Saudi Aramco), Saudi Arabian Basic Industries (SABIC) and SABIC Engineering & Project Management (SABIC E&PM) as an approved vendor for Contractors, Saudi Electricity company, SWCC, RC and major contractors.

As part of its ongoing commitment, **HADI** continues to develop and enhance its Quality Assurance / Quality Control and HSE policies & system to match global industry standards and to keep itself on the cutting edge of industrial market.

**HADI** with its rich professional management experience & highly trained and experienced professionals endeavors to serve and satisfy its customers to the optimal and achieve par excellence through quality service, commitment and to be recognized.

By our clients as the most reliable Construction, Contracting, Steel Structural Fabrication, Heavy Equipment rental & Industrial service organization. Everyone in the Sun state family works collectively to ensure your order is completed and delivered on time, all the time. We draw immense satisfaction from the projects where we work with clients to produce customers delight. This level of excellence permeates the entire organization.

***Satisfying Customer needs for their requirement is our Prime Motto.....!!***

## **Brief Introduction About Us**

We **HADI International Trading & Contracting Company (HADI)** is a reputed and recognized Saudi company established in 2002 (Under the Name **HADI Industrial Services**) and with a view to expand its horizon started its operations in the Kingdom Of Saudi Arabia and overseas registered **HADI International Trading & Contracting Company** with wide spectrum of activities.

**“A Trusted Name in Contracting, Civil Construction, Structural Fabrication, Industrial services & Equipment Rental”** we are highly specialized in execution of multi face projects. **HADI** is involved in a wide spectrum of activities including, Construction, Industrial Contracting and LSTK projects, Structural Fabrication, Industrial Services, Supply of qualified / technical manpower & Equipment rental services.

Since through our service, we have involved in the development of Petrochemical Industries and other Infrastructure developments as we contribute to the growth of the nation along with the citizens. We continue to incorporate new ideas and modernization efforts, whilst drawing simultaneously on the experience, industry knowledge and customer loyalty build up over the years.

**HADI** stands in the market active and have a buildup reputation and are rich professional management experience & highly trained and experienced professionals endeavors to serve and satisfy its customers to the optimal and achieve par excellence through quality service, quality equipment, commitment and to be recognized by our clients as the most reliable Civil Construction, Contracting, Equipment rental, Structural Fabrication & Industrial services organization.

Today the **HADI** Company comprises a strong multi-national task force of dedicated professionals. Under the dynamic leadership of its Chairman Mr. Hussain Ali Al Duham, **HADI International Trading & Contracting Company** has an established a strong base.

In **Civil Construction** we undertake Backfilling, Excavation, Asphalt, Concrete, Paving, Foundations, Road works, Sewerage & Water Treatment Plants works etc.,

**Contracting** is a strong **“arm”** of company specialized as an electro mechanical contractor for Petro-chemical plants, Pipe mills, Air Separation plants, Cement Plants, Gypsum Plants, Non-woven products, Supply erection & commissioning of plant equipment, Plant Services involving overhaul & maintenance during turnarounds / shutdowns, Pre-fabrication and installation pipe modifications, Insulation and cladding services, Bolt tightening and tensioning services, Installation of Fire Fighting Equipment etc.,

### Our Vision:

- **HADI International Trading & Contracting Company**, aims to be the leader in the supply of quality engineered products and services, by continually improving our relationships with customers, employees and suppliers; promoting a healthy environment and providing our services at best market prices and to be a cut above the rest and exceed our customer`s expectations by abiding our core values.
- *Satisfying Customer needs for their requirements is our Prime Motto.....!!*

### Our Mission:

- To be recognized by our clients as the most reliable Construction, Contracting, Structural & Steel Fabrication, Industrial Services & Equipment Rental Company, by providing reliable service and quality products to satisfy its customers and to achieve par excellence through quality service and commitment.

### HADI Core Competency:

- Integrity, Professionalism, Ethics, Honesty and Commitment
- Productivity derived from intellectually applied Technology and Human Insight
- Vast Experience in the fields of Construction, Contracting, Industrial Services, Structural & Industrial Fabrication & Heavy Equipment Rental.
- Complete range of services in Equipment for Cranes, Forklifts, Man-lifts, Tele-handlers, Wheel Loaders, Excavators, Vacuum Trucks, Welding Rotators, Welding Positioners, Welding Column & Boom, Vibratory Hammers and stationery equipment like Welding Generators, Tower lights, Air Compressors, Diesel Power Generators, Dewatering Pumps etc.,
- Sound Technical Resources
- Dedicated back up service

### **Structural Concrete Repair:**

Structural concrete repair may be needed during the life of a structure, small movements of the land and settling of the soil under the structure will cause foundation cracks and structural damage to appear. A cracked foundation is weak and unable to properly support the structure. When a foundation shifts it means that the earth under the structure has moved and the walls and foundation are in need of repair. Some of the problems that can be found will be bowing walls, cracked walls and uneven settling. This is due to the soil under the foundation shifting because it expands and contracts as it absorbs moisture and dries out again. If the problems are allowed to continue, the structure will collapse. It is at this time best to have structural damage repair done. This will eliminate the problem and extend the life of the structure. What happens when a structure begins to fail is cracks will appear in the concrete and in the foundation. When these are first noticed they should be addressed immediately because what is visible on the surface could be hiding a much larger problem. Putting off repairs will only worsen the problem and cost much more when the structure is repaired. When the foundation of the building is showing signs of wear and cracks, then it is time to consider getting professional structural repair done.

**HADI** are professionals in structural concrete repair business and are fair and consistent. We will take an in-depth look at the damage that has occurred, and will do a thorough investigation of the condition of, Structure and the Foundation. We will then explain what has happened and what will happen to the structure if action is not taken to correct the problem. We are experienced in structural concrete repair, structural damage repair, assessing cracked foundations and repairing foundation cracks.

### **Structural Concrete Crack Repair:**

Most engineering authorities agree that it is the very nature of concrete structures to crack to a minor or major degree. Cracking indicates that the structure has been forced to absorb the energy of some form of stress. Concrete cracking is caused by:

- Shrinkage during cure, before the concrete has developed its full strength.
- Mechanical overload, either static or dynamic.
- Temperature changes in a structure where no provision was made for movement or controlled cracking.
- Base or foundation settlement.
- Overworking or excess watering of the surface

Company Name	:	<b>HADI International Trading &amp; Contracting Company</b> Construction : Steel Structure : Industrial Services
Client	:	
Subject	:	<b>Company Profile &amp; Pre-Qualification Documents</b>
Project	:	

### Cracks can be repaired:

However, when a concrete structure has cracked for any of those basic reasons, it does not necessarily mean that the structure has failed. On the contrary, any cracked concrete structure can be repaired effectively and most often permanently, provided the structure has not been wholly deformed and the original cause of cracking has stopped. This is a proprietary method of epoxy injection fissures down to 0.002 inches wide for their full depth with a high strength epoxy resin adhesive. **HADI** practicing this method have been trained. When the injected adhesive cures, it seals the crack entirely and also restores the concrete to its original monolithic condition. Injecting repairable cracks in concrete will:

- Restore structural and/or design strength to the cracked concrete structure.
- Eliminate serious spalling of concrete initiated by cracking and aggravated by freeze thaw cycling,
- Prevent corrosion of reinforcing steel and pre-stress tendons by encapsulating them against moisture or water contact.
- Stop the leakage of water and fluids through concrete structures.
- Repair concrete architecturally without any of the unsightly surface marks caused by standard surface crack repairs.

### Crack Injection:

Because it works, but take care as the correct system, material and testing are critical to any crack repair success. **HADI** Concrete Injection team has mastered this in the repair of waterproof structures such as Water & Oil tanks. This is arguably one of the more skilled and critical repairs to perform. Concrete injection allows the cracking to be “knitted” back together like a fracture of a bone. Like a bone fracture the injected material needs to be stronger than the original bone. This can be achieved by using the correct materials and process can achieve a 100 mpa. 3-4 times stronger from the original concrete and to ensure this each contract is core drilled and tested.

### Injection & grouting techniques:

We perform all injection and grouting techniques used in structural rehabilitation, repairs or waterproofing applications:

- Epoxy pressure injection of cracks
- Chemical grout waterproofing injection works
- Vacuum grouting techniques
- Concrete Repair and Restoration

Project	:	

## **Saudization Policy:**

As per the Ministry of Labor regulation, we are strictly following and promptly maintaining adequate percentage of Saudi national personnel always. We strictly follow the Council of Ministry regarding the local employment. Further **HADI** Company aims to maximize and to increase the percentage of Saudi nationals from time to time.

To achieve the best results we are under process to implement training corner at our Jubail workshop for training personnel which confirms our attention to provide necessary training to upgrade and to ensure the highest possible level of performance in order to achieve our objectives and also serve our customers.

Our training programme curriculum includes not only theoretical training but also hands on job training. We are training them on various fields i.e. scaffolding, rigging, fire safety & environment programme, technical training in fields of electrical, hydraulics, mechanical maintenance.

We are committed significantly in conducting training and we continually improve our internal and external training programs. We always strictly follow the Saudization policy and can assure that required percentage by PR will be maintained throughout the contract period.

## **HADI International Trading & Contracting Company** **HEALTH & SAFETY POLICY**

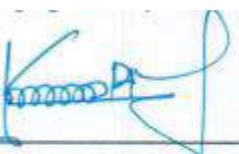

**HADI International Trading & Contracting Company** is committed to ensuring a safe and healthy work environment is provided and maintained for all personnel and minimizes impact on the local community.

**HADI** accept responsibility for the effective implementation of this policy and will provide systems, training, supervision and visible support to ensure a safe work environment.

Line Management shall be responsible for the safety performance of activities within their area of responsibility and must accept that all safety and health occurrences are preventable and continually aspire towards this. Acceptance of this responsibility is not negotiable. All employees have the responsibility to perform their duties in a manner which ensures their own safety and that of others.

To achieve this **HADI** International Trading & Contracting Company will:

- Formally assess health and safety in all construction, Contracting & Equipment Rental activities and incorporate systems to eliminate or control hazards.
- Commit sufficient resources for the effective implementation of safety management systems in all areas of operation.
- Ensure all personnel are motivated, skilled, informed and resourced to carry out assigned work in a safe manner.
- Provide a continuous program of education and learning to enhance skills and increase health and safety awareness.
- Investigate, correct and report all safety and health occurrences.
- Audit and evaluate health and safety management systems and programs to continuously improve our safety performance.
- Provide an effective system of injury/illness rehabilitation management.
- Implement and maintain Client health and safety requirements.
- Compliance with all statutory regulations.
- Engage competent subcontractors who will comply with required safety practices.
